4. All disputes are subject to Ludhiana Jurisdiction
5. **DURABLE ASSURANCE:** Avail all the warranty benefits by only using Durable Pipes with Durable Fittings and Solvent cement.

COMPANY OVERVIEW

WE MAKE THINGS WORK

The Orient Tanks Group was originated in the year 1998 with the only aim of providing the utmost quality products to the customers. The group itself has had a humble beginning, starting from delivering their products in small villages through local rickshaw walas to supplying their products to various states such as Punjab, Himachal, Haryana, Chandigarh, Jammu & Kashmir and Rajasthan. Presently, our product portfolio includes Plastic Water Tanks, Agricultural Spray Tanks and Garden Pipes. As dealing in various PVC products for several years and gaining the immense knowledge of PVC industry in and out, we are here with you, proudly launching our brand-new venture named 'Durable Pipes and Fittings'.

We as an organization have a confidence in providing our best products made with the latest technology to millions of households and agriculturalists also while contributing towards India's New Development Plans. At Durable Pipes & Fittings, we believe that serving customers in India is not just about selling products to the vendors or to the customers but instead it's about understanding their needs and their concerns and that's what makes a company more successful.

VALUES

"Our work will be guided and informed by our beliefs and commitments to:

QUALITY ASSURED

PARTICIPATION

INCLUSIVENESS

OPENESS

MISSION

The Durable Group aims to be world class Pipe & Fittings manufacturing organization for entire Indian Market . We seek to achieve customer satisfaction by ***exceeding their expectations*** in quality , delivery , and cost through ***continuous improvement*** and ***customer interaction***.

VISION

“To become the most Competitive and Benchmarking Company in India & delivering superior returns to all our stakeholders.”

OUR PRODUCT RANGE

UPVC PRESSURE PIPING SYSTEM FOR AGRICULTURE & WATER SUPPLY

SALIENT FEATURES

01

HIGH FLOW CHARACTERISTICS

02

LIGHT WEIGHT MAKES EASY HANDLING

03

SUITABLE FOR PORTABLE WATER SUPPLY

04

COST SAVER AND POWER SAVER

05

SMOOTH INTERNAL SURFACE

WHY YOU CHOOSE RING FIT?

COST EFFECTIVE

100% LEAK PROOF

**HIGH FLOW RATES
NO CHOKING**

WHY YOU CHOOSE SOLFIT?

TOUGH AND RELIABLE

CORROSION RESISTANCE

SMOOTH INTERIOR

INSTALLATION

INSTALLATION GUIDE RING FIT

Easy and 100% leakproof installation.

STEP 1: Cutting

Measure and cut pipe to size. Ensure to cut the pipes straight and square. Inspect pipe ends thoroughly before making the cut. If any cracks or split in the ring is noticed cut off a minimum of 25mm beyond the visible crack before proceeding

STEP 2: Chamfering and Deburring

Burrs in and on pipe end can obstruct flow/proper contact between the pipe and socket of the fitting during assembly and should be removed file/a pen knife or a deburring tool are suitable for this purpose. A slight bevel on the end of the pipe will ease entry of the pipe into the socket of the fitting socket.

STEP 3: Fitting Preparation

Use a clean dry cloth to wipe the dirt, moisture from the fitting and pipe end.

STEP 4: Check for Yellow Seal™

Check the socket end for Yellow Seal™. Ensure that the yellow part of the seal is towards the outside of socket.

STEP 5: Lubricant

Apply the lubricant on the chamfered end of the pipe.

STEP 6: Assembly

Immediately insert the pipe into the fitting socket. Rotate the pipe slightly while inserting. Withdraw pipe until the mark is 12 mm away from socket. This means a 12 mm gap exists between the end of the pipe and the socket register. This gap will allow the pipe to expand without distorting the pipe-work jointing.

DURABLE RINGFIT Pipes and Fittings are joined with the help of DURABLE SWR Lubricant. For faster plumbing and leak proof joints we strongly recommend the use of DURABLE lubricants only.

INSTALLATION GUIDE SOL FIT

Easy and 100% leakproof installation.

STEP 1: Cutting

Measure the pipe length accurately and make a visible marking using a felt tip pen. Ensure that the pipe and fittings are size compatible. You can easily cut with a plywood cutting saw/ ratchet cutter or a wheel cutter. Cutting the pipe as squarely as possible (at 90°) provides optimal bonding area within a joint. Inspect pipe ends thoroughly prior to making a joint. If a crack or splintering is noticed cut-off a minimum of 25 mm beyond the visible crack before proceeding

STEP 2: Deburring/Beveling

Burrs in and on pipe end can obstruct flow/proper contact between the pipe and socket of the fitting during assembly and should be removed file/a pen knife or a deburring tool are suitable for this purpose. A slight bevel on the end of the pipe will ease entry of the pipe into the socket of the fitting socket.

STEP 3: Fitting Preparation

Using a clean dry rag, wipe the dirt and moisture from the fitting sockets and pipe end. Dry fit the pipe to ensure total entry into the bottom of the fittings socket and make a visible marking using a felt tip pen.

STEP 4: Solvent Cement Application

Apply an even coat of solvent cement on the pipe and the socket end of the fitting. Do not use thickened or lumpy solvent cement. It should have a flow consistency like that of syrup or paint

STEP 5: Assembly

Immediately insert the pipe into the fitting socket, rotate the pipe ¼ to ½ turn while inserting. This motion ensures an even distribution of cement within the joint. Hold the assembly for 10 seconds to allow the joint to setup.

DURABLE SOLFIT Pipes and Fittings are joined with the help of DURABLE SWR Solvent Cement, which is a single step fast setting solvent cement. The bonding takes place due to chemical fusion of the mating surfaces.

UPVC COLUMN PIPES

SALIENT FEATURES

- 01 RIGID IN NATURE WITH LONGER LIFE
- 02 100% LEAK PROOF WITH HIGH FLOW RATE
- 03 LOW INSTALLATION COST, THUS COST EFFECTIVE
- 04 ODOURLESS & HYGIENIC, SO SUITABLE FOR POTABLE WATER SUPPLY
- 05 25% HIGHER DISCHARGE COMPARE TO G.I PIPES
- 06 MINIMUM FRICTIONAL LOSS
