

Contractor License Management System

Inaugurated by

Sri. ROSHY AUGUSTINE

Hon'ble Minister for Water Resources

21st June 2021

Kerala Water Authority

Contractor License Management System

Issues))

The current procedure was inefficient since it required the contractor to travel to the appropriate office to obtain an application form and pay the required cost. He must also be present with the necessary documentation for verification.

Solution))

Contractors can apply for all licence classes online in just a few easy steps. They can use this application to apply for a new contractor licence, a licence renewal, or a licence upgrade.

Benefit))

Contractors from all around India are eligible to apply for a licence and participate in tenders. Existing contractors can also renew or improve their licences without having to visit the office during these challenging travel days.

Outcome))

Transparency is improved, tender competitiveness is increased, and KWA is able to obtain good proposals from countrywide players.
