# 1. Install , Mozilla Firefox (Latest version)

URL: <https://www.mozilla.org/en-US/firefox/windows/>

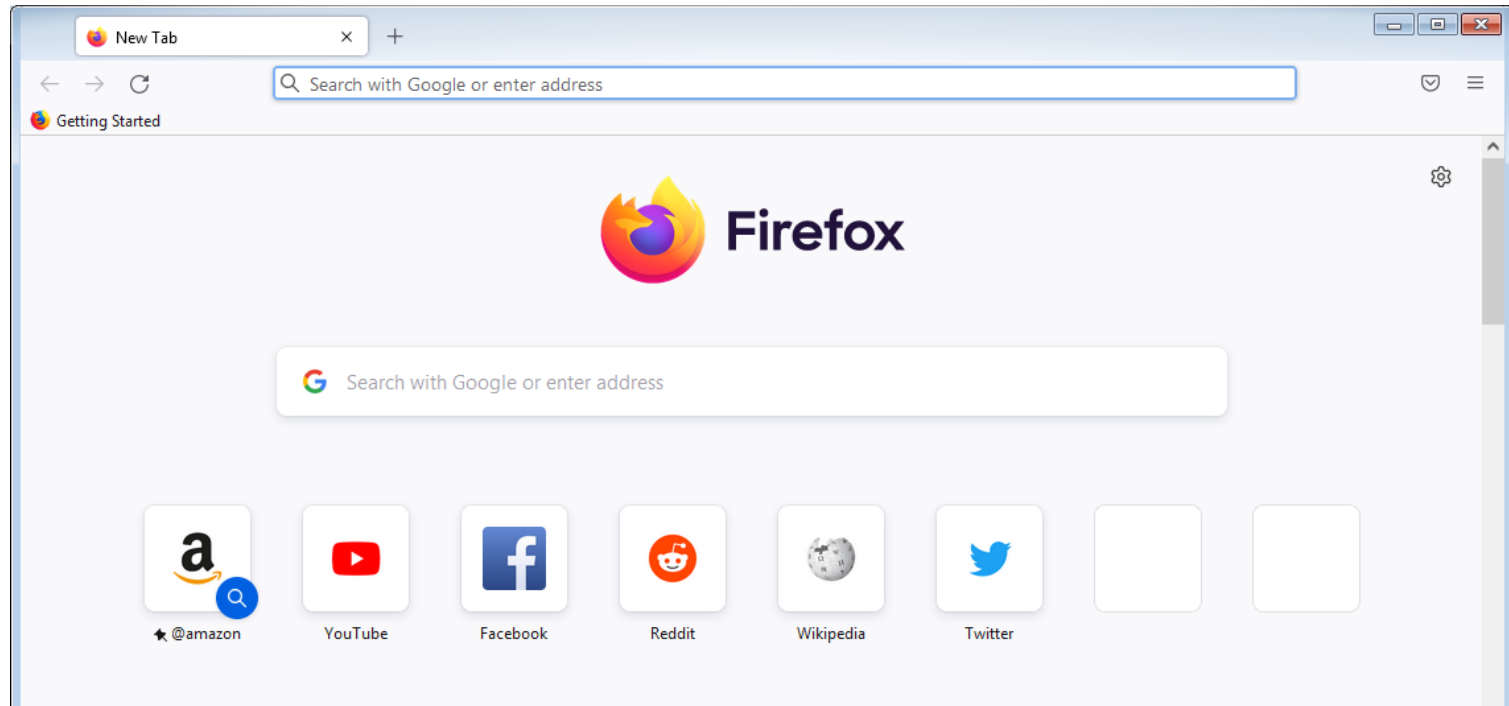

## Download Mozilla Firefox for Windows

[Download Now](#)

[Firefox Privacy Notice](#)

[Download a different platform or language](#)

## 2. Open Firefox Browser

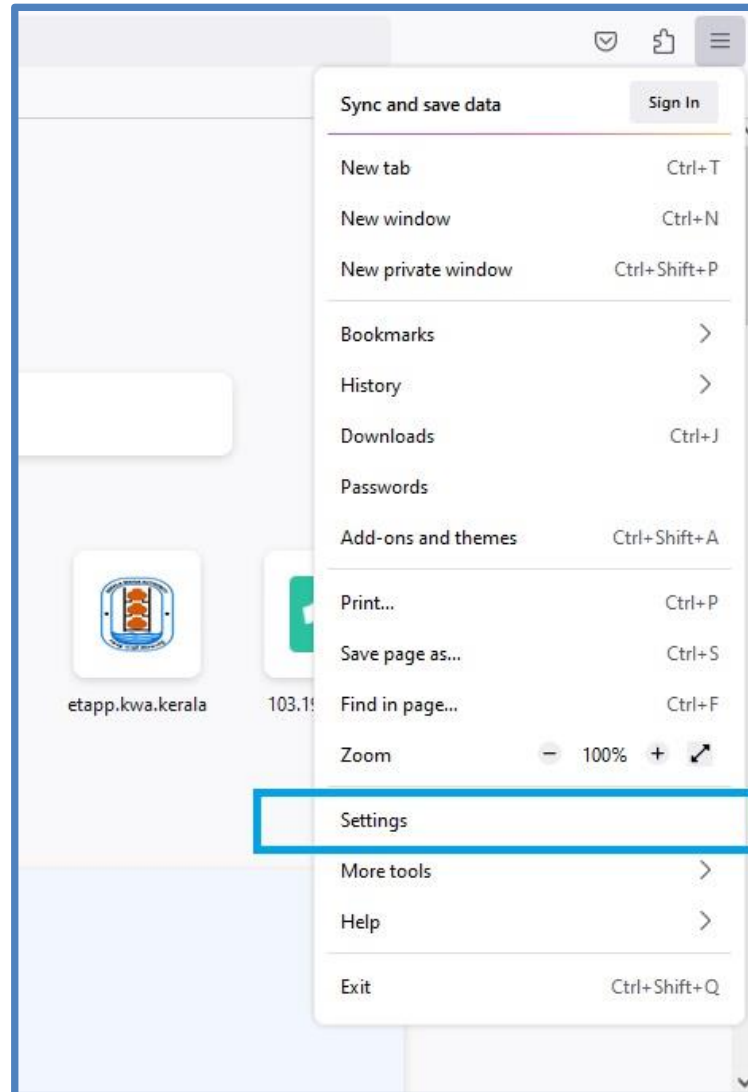

# Setup KSWAN proxy

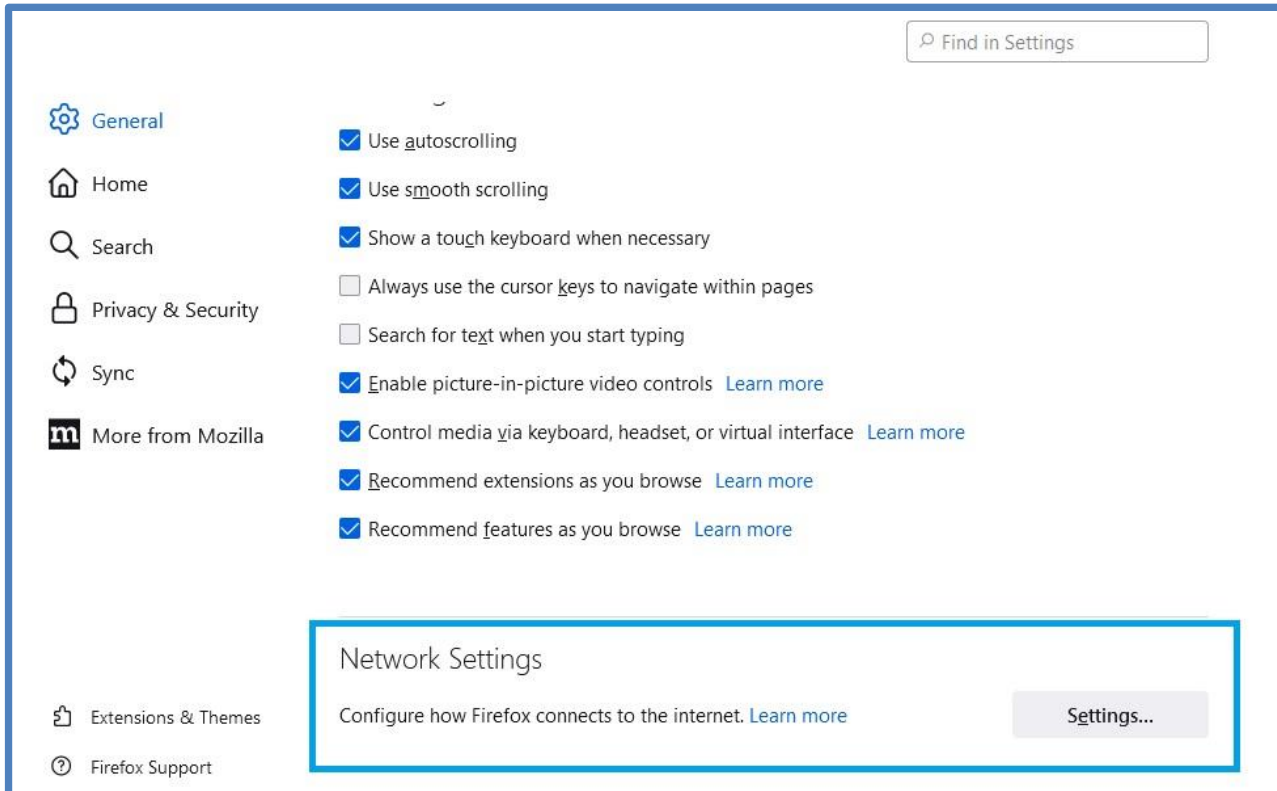

**Open Firefox.** Its app icon resembles a blue globe with an orange fox wrapped around it.  
around it.

**2.Click ☰.** This icon is in the top-right corner of the Firefox window. A drop-down menu will appear. Click settings at the bottom

3. In the General panel, go to the **Network Settings** section.

**Click Settings....** This button is on the lower-right side of the page.

# Doing so will open the Proxy Settings window.

The image shows a screenshot of the Windows 'Connection Settings' dialog box, specifically the 'Proxy' tab. The window title is 'Connection Settings' with a close button (X) in the top right corner. The main heading is 'Configure Proxy Access to the Internet'. There are four radio button options: 'No proxy', 'Auto-detect proxy settings for this network' (which is selected), 'Use system proxy settings', and 'Manual proxy configuration'. Under 'Manual proxy configuration', there are three rows of input fields: 'HTTP Proxy' with a 'Port' field set to '0', 'HTTPS Proxy' with a 'Port' field set to '0', and 'SOCKS Host' with a 'Port' field set to '0'. A checkbox 'Also use this proxy for HTTPS' is located between the HTTP and HTTPS proxy fields. Below the SOCKS Host field, there are two radio button options: 'SOCKS v4' and 'SOCKS v5' (which is selected). At the bottom, there is an 'Automatic proxy configuration URL' radio button, followed by an empty text input field and a 'Reload' button. In the bottom right corner, there are 'OK' and 'Cancel' buttons.

**Check the "Manual proxy configuration" box.**

The image shows a screenshot of the Windows 'Connection Settings' dialog box. The title bar reads 'Connection Settings' with a close button (X) on the right. The main content area is titled 'Configure Proxy Access to the Internet'. There are four radio button options: 'No proxy', 'Auto-detect proxy settings for this network', 'Use system proxy settings', and 'Manual proxy configuration'. The 'Manual proxy configuration' option is selected and highlighted with a blue border. Below this option, there are three proxy configuration sections: 'HTTP Proxy' with a text input field and a 'Port' dropdown set to '0'; a checkbox labeled 'Also use this proxy for HTTPS' which is unchecked; 'HTTPS Proxy' with a text input field and a 'Port' dropdown set to '0'; and 'SOCKS Host' with a text input field and a 'Port' dropdown set to '0'. Below the SOCKS Host section, there are two radio button options: 'SOCKS v4' and 'SOCKS v5', with 'SOCKS v5' selected. At the bottom, there is an 'Automatic proxy configuration URL' option with an unchecked radio button and an empty text input field. To the right of this field is a 'Reload' button. At the bottom right corner, there are 'OK' and 'Cancel' buttons.

**Enter your proxy information.** You'll need to fill out the following fields:

**HTTP Proxy** - Your proxy server's IP address goes here. **10.1.6.16**

**Port** - The server's port number goes here. **3128**

The image shows a screenshot of the Windows 'Connection Settings' dialog box. The 'Manual proxy configuration' option is selected and highlighted with a blue border. The 'HTTP Proxy' field contains '10.1.6.16' and the 'Port' field contains '3128'. The checkbox 'Also use this proxy for HTTPS' is checked. The 'HTTPS Proxy' field also contains '10.1.6.16' and the 'Port' field contains '3128'. The 'SOCKS Host' field is empty and the 'Port' field contains '0'. The 'SOCKS v5' option is selected. The 'Automatic proxy configuration URL' option is not selected. The 'OK' and 'Cancel' buttons are visible at the bottom right.
